Number 24

Splendid Junior Programme Given

A splendid Junior program was given at the First Ward Sacrament Meeting Sunday evening, August 13th, under the direction of the Deacons of that ward. Quorum President Barker Selman took charge, and twelve speakers responded with enthusiasm to their assigned numbers on the program.

The Sunday School Choir aided with the music, besides two other special numbers.

The program was as follows:

Opening prayer—Reed Fawns
Chairman Baker Selman made a few opening remarks regarding the program, and announced the text, which was Doc. and Cov. Sec. 107: 99-100 on "Duty," and this was repeated in unison by all the deacons present at the meeting.

David Wood was the first speaker, his topic being, "How Chas. W. Penrose did his work as a Deacon."

Francis Selman related "Some of the Outstanding Characteristics of President Heber J. Grant."

"Something of the late Pres. Chas. W. Nibley" was related by Winston Blackmore.

Miss Beth Selman, rendered a vocal solo.

Ross Mendenhall spoke on "J. Reuben Clark as a Leader." "The late Dr. James E. Talmage," was spoken of by his nephew James Ross.

"Why I Want to be a Deacon" was the topic given by Robert McMullin.

Talk on "Duty" by Roland Weed.

"Our Duties Well Done" by Winifred Litchfield.

Reading "Keep on Going" by Miss Mildred Boyson.

"Monuments to Our Pioneers" by Guy Alexander.

Willis Taylor, who had just returned that day from a trip to Utah was asked to give a short extemporaneous talk.

The closing prayer was by Robert Wood.

Everyone was high in their praise for the boys who did so well, and presented such a very enjoyable and interesting program.

News Notes

Newspaper advertising is both whip and spur for trade.

Do you need \$10.00 in Cash? Be at the Capitol Friday.

Mr. and Mrs. S. I. May and A. E. Hancock were in Tyrell's Lake and Wrentham on Sunday.

Harry Deane of Lethbridge Southern Alberta Sales Manager for Lubriol, the new and wonderful lubricant, if it is half what the claims made for it indicate, was in Raymond on Friday last.

See the most brilliant comedian on the screen. Will Rogers in his latest picture "TOO BUSY TO WORK" Capitol Friday and Saturday.

On Tuesday afternoon Mrs. Jane D. Collett entertained a number of ladies at a quilting party. The quilt was finished that afternoon and is to be donated to the Second Ward Carnival this fall. It is a beautiful one of double wedding ring design.

We are informed that Alma Sumnerfelt, who taught the past couple of years at Patterson, S. D., has the O. K. School for the coming term, and that Bernice Hicken, who has been teaching there, is going to University for the coming year.

News Notes

Teddy Davis was a Lethbridge visitor on Saturday.

"TOO BUSY TO WORK" with Will Rogers Friday and Saturday.

Gordon Brewerton of Cardston was a Raymond visitor on Wednesday.

Thursday and Friday were both real warm days, and the shade was a very popular place.

Mrs. Roxie Robbins returned on Saturday's bus from a visit with her sister, Mrs. Fred Burton, in Cardston.

Geo. W. and Arthur N. Green of Lethbridge were business visitors in Raymond on Saturday last.

"The Match King" with Warren William Capitol Monday & Tuesday.

Due to the light crop, the Youngstown Plaindealer reports that the Pioneer Grain Co. Elevator at that point was closed the last of July, and will not reopen for the present grain buying season.

The recent flood which did so much damage to property in Denver, spread a little over the flooded portions, which contains gold estimated at \$8,000,000. The only trouble is the fact that the layer is so thin it can not be mined profitably.

Hyrum Kimball told us Friday, "for the first time in over 30 years, the entire family, except myself, are away from home today." Part of them were in Lethbridge, some in Taber and some in Warner.

Mr. and Mrs. C. W. Lamb, Mr. and Mrs. A. W. Kirkham and Mr. and Mrs. Frank Leavitt returned home Wednesday from a holiday trip to Waterton Park. "Bert" says they done some fishing but had little luck as all the lakes and streams in the Park are pretty well fished out.

Because of financial conditions, the publishing of a Standard Public School Reader for the four western provinces will be held in abeyance for awhile. This was the decision of the meeting of the Deputy Minister of Education in Banff this week.

Very few people are ever saved from death by beer but when Jerry Clark, Toronto truck driver upset, and his truck took fire, the drip, drip, drip of the beer kept his clothes saturated and prevented the flames from reaching him.

Raymond was visited on Sunday by quite a crowd from the Sunday School of Tyrell's Lake branch. Through some misunderstanding these people thought it was Conference here, and came up to attend. We hope they will get back next week when our Conference is in session.

Demoy Nilsson and Leland Nelder returned home Tuesday afternoon from a horse back trip to Waterton Park. They report a very enjoyable time. On the return trip a rain storm of cloud burst proportions was encountered about 3 miles east of Cardston. They were caught in the rain and the journey up and back took a day and a half each way.

Quarterly Conference Saturday and Sunday

The regular Quarterly Conference of the Taylor Stake of Zion will be held Saturday and Sunday, this week, August 19th and 20th, and will be a Convention of the M.L.A. and Relief Society organizations, with sessions Saturday evening, likely at 8 p.m., and on Sunday at 10, 2 & 7:30, to which the general public is invited.

Representatives of the Mutuals and Relief Society Board will be in attendance, and those present from Salt Lake at the Lethbridge Stake Conference

were Elders W. O. Robinson and John D. Giles, and Mrs. Nettie Bradford, Mrs. Marie C. Thomas and Mrs. Ethel Anderson all of Salt Lake City, who all have special work to take up. It is expected that they will be present here.

The Stake Choir under the direction of C. F. Tollestrup, will furnish music for the meetings, and they have been practicing for some time, and have some splendid numbers ready for rendition during the sessions.

News Notes

Ross Larson and Ted Gourls, were to the coal mines on the river Wednesday afternoon last.

Rev. Foote was in Wrentham on Sunday, where he held services in the forenoon.

Hogs on the Calgary market were up 35c. per hundred last week. This gain is encouraging to those with swine for sale.

A. W. Kirkham picked a bucket full of lovely chokecherries from the bushes he has planted in his garden here.

Mr. and Mrs. Phillip Rogers, newly married, motored in here from Spokane Thursday afternoon last, and will spend a few days here at the Club house.

R. E. Nuttall, has received a call to the North-Western States Mission and will leave Salt Lake City for his field of labor on October 10th. He expects to leave Raymond about September 10th.

D. W. Card had the misfortune to cut his foot with an axe while working at the Factory Monday. He is getting around but has had to cut his shoe to give the swollen foot more room.

Melvin Carter and family, of Salt Lake City, visited here over the week-end with L. L. Carter and family. They returned Monday. Melvin is working in the Meat Department of one of the Big Chain stores in Salt Lake City.

Born to Mr. and Mrs. Lovett, Wednesday, August 16, a baby boy. Mother and son are doing nicely, and Grandfather and Grandmother Betts are as proud, if not more so than the parents.

Local Boys Do Well at Calgary

Mr. and Mrs. J. H. Walker, Harris and Fay and Bruce Galbraith, were all in Calgary last Saturday for the Scotch Highland Games held there, in which the three boys took part, and considering the fact that they were in competition with the best athletes of the West, among whom was Sgt. Sutherland, the outstanding all-round athlete of Canada, they made a very good showing. Following are the winnings they made:

Bruce tied for second place in the High Jump, but in the jump off was beaten by Willets and was forced to take third.

Bruce was second also in the Pole Vault.

Fay and Sgt. Sutherland tied for 3rd place in the Pole Vault and Sutherland conceded third to Fay.

Mr. and Mrs. J. H. Walker, Harris and Fay and Bruce Galbraith, were all in Calgary last Saturday for the Scotch Highland Games held there, in which the three boys took part, and considering the fact that they were in competition with the best athletes of the West, among whom was Sgt. Sutherland, the outstanding all-round athlete of Canada, they made a very good showing. Following are the winnings they made:

incial record for the Pole Vault at 11ft. 4 1/2 inches, beating his own mark of last year by 2 inches. This win gave 1st 2nd and 3rd in Pole Vault to our boys.

Harris was also 3rd in the 440 yard dash, and the Hop Step and Jump.

Doral Pilling set a new record in the Javelin throw, when he sent it through the air for 195 feet and over.

Another Provincial record was set by Norman Holt of Bashaw, when he stepped the 1/2 mile in 2 min and 1 second.

Bishop Walker reports the meet as exceptionally fine, the competition keen, but a splendid feeling among the contestants, and with him, we are justly proud of the showing of our three boys who made such a good showing for Southern Alberta, and especially for Raymond.

Harvesting Is Now In Full Swing Here

WEDDING BELLS

EVANS — DEPEW

The wedding was solemnized Monday afternoon by Bishop O. W. Ursenbach of Lethbridge, of Miss Lucille Depew, daughter of Mr. and Mrs. Warren Depew and Jack Evans, second son of Mr. and Mrs. J. W. Evans. Those present besides the contracting parties were Mrs. Bud Fisher, Mrs. Alice Humphries and Mrs. Rex Shurtz.

Both young people are well and favorably known here, where they intend to make their home, and they have the best wishes of their many friends for a long and happy married life.

News Notes

Mrs. Elsie M. Stevenson tells us that she gathered two quarts of nice ripe chokecherries off a bush that she has growing in her garden, and this was after the birds had eaten all they wanted.

Mr. and Mrs. John Bradshaw Mr. and Mrs. Eugene Briggs spent part of Wednesday afternoon at the A. W. Kirkham home. They are visiting here from Utah.

Miss Betty Chilcott, of Ontario, a new comer to Trail B. C., was murdered there Wednesday, and Sidney Hunt charged with the killing is in a serious condition from a self inflicted wound.

Dr. Hall and party returned on Wednesday from the Century of Progress Exhibition in Chicago, reporting a very enjoyable though tiresome journey, because of the short time. Asked as to the Exhibition itself, the Dr. stated that in some respects it was somewhat disappointing, probably because a person went there expecting to see too much.

STORES AND THE PUBLIC

On political issues the world cannot agree; in matters of religion there are eternal differences of opinion; all people have ideas others think lack sound reasoning; but on one point we will agree; everyone wants to see his home town prosper and grow.

The way to a growing prosperous community is through good stores. And the way to good stores is through trading at home. Buy away from home and watch your town die.

Some experts contend that good trading facilities build population and real estate values; others say that good stores follow population, but again, all agree that local prosperity can never come until adequate trading facilities are established.

No town was ever built by money sent to mail order houses or spent in the neighboring city. There are the dollars that build the big cities and their large mercantile fortunes.

A large part of the dollar spent in the home community remains there. It travels from home to grocer, to the butcher, to the hardware merchant and so on around the wheel of home trade. Spent out of town the dollar has gone forever.

Every community likes to take pride in its stores. And yet those stores, which are expected to keep up the community standard do not receive all of the shopping dollars. Stores are what the customers, not the proprietors, make them.

Grain cutting is the order of the day. Binders are busy in nearly every field and stooks of golden grain are dotting the countryside. Any definite statement as to average yield impossible as yet, as very little grain has been delivered to the elevators. In the district west and north of Welling, a number of combines are running steadily, and elevators there have taken in quite a little bit of grain. The average would be around 12 or 13 bush. per acre, beautiful grain, all grading No. 1, and weighing 62 lbs. per bushel and better, and of a lovely color. Fields run from 7 to 20 bushels in that district. Pastures are still burned and brown, and grazing for winter feed will be confined to stubble fields, as there will be no feed on sod unless late rains benefit the grass lands.

Beets are doing well where cultivated and watered, and are about the only crop which is benefitting by the profusion of sunshine that has been given to us the past six weeks. Fields are a pretty healthy looking green now.

News Notes

See Warren William in "THE MATCH KING" Capitol Monday

The weather continues nice and warm, dry and sunshiny. Everyone enjoys it.

S. B. Smith was busy last week kalsomining the interior of the Stake House. This will give it a nice clean appearance for Conference.

FREE Friday 52 piece dinner set or \$10.00 in Cash. Feature picture Will Rogers in "TOO BUSY TO WORK".

Mr. and Mrs. Frank Atterton Sr., of Cardston, were Raymond visitors Friday for a few minutes with their son and wife, on their way to Lethbridge.

C. R. Wing made a trip up the Crow's Nest Pass last week on business in connection with supplies for the coming Sugar Beet campaign.

Mr. and Mrs. F. R. Taylor and family returned home Sunday from a holiday trip which took them to the family home in Utah, and Pacific Coast points.

Constable Ellis of Magrath, and Magistrate Low of Cardston were in Raymond on Tuesday, and Const. Ellis was here again Thursday.

The annual house hunting campaign is on again in Raymond. Each fall sees everything habitable rented for the winter months.

Wheat has been at the pegged price for the last couple of days which is 70 and 1-8 cents per bushel, for October wheat at Winnipeg. Local prices today were 49c. per bushel for No. 1 in wagon load lots, raising 2 cents during the forenoon.

Ex-Premier King said in Lethbridge Monday that Premier Bennett's cabinet associates had little to say in Ottawa. Ottawa is not the only place where one man rules public bodies, we think.

O. H. Snow was in Edmonton over the week-end on business, and on returning home was somewhat under the weather, and was away from the Town Hall on Wednesday and Thursday.

THE IDEAL CITIZEN

An ideal citizen is the one who sees clearly and ever something good in the city and never loses the opportunity to spread that good news abroad that others might derive the benefits therefrom, whose unselfishness prompts him to want others to share opportunities, health and pleasure which his home city offers.

Loyalty is the first requisite for the ideal citizen. The love for the place and his neighbors which dismisses the thought of self-interest or policy and resolves itself into the knowledge of duty when he does all in his power to make the city a better place in which to live.

There are three distinct attitudes which a citizen may assume toward the place in which he lives, which furnishes him food, shelter and association for himself, and family, to boost, to remain quiet or to knock. The booster is that ideal citizen who is never forgetful of the obligations which is due the home city. He is ever ready at the front when any movement is launched which might tend to the advancement of the interest of the city. While others see darkly, to him good is visible at all times. The quiet citizen is satisfied to let the neighbor do the work and content to lull the city asleep and let it rest. The knocker is the man who is without a country. There is no room for him anywhere, his presence dampens the enthusiasm of every man or group of men who unfortunately come in contact with him. Having no faith in his own ability to go forward, he naturally lacks faith in his home city to do so.

You have the chance to belong to either of the three classes. If you are a booster, your

neighbor knows it well and will boost you. If you are aligned with the quiet class, you will not be regarded one way or the other, for the man who selects to steer in the middle of the stream, gets no support from either side. If, unfortunately, you are a knocker, get ready to be knocked, for eventually it is coming to you. As you give, so will it be meted out to you.

Raymond would be an ideal city if only there were more ideal citizens. Let us have them.

BY ITS NEWSPAPER

(High River Times)

This week there occurred an incident, interesting at least to the local press. A business man in a remote city had contemplated purchasing a business in High River. He was in doubt as to the move, and as a precautionary measure decided to subscribe to the High River Times and find out what manner of town this might be. For six months, it seems, he has been one of our subscribers, studying news columns and advertisements, and probabilities and the class of people here. Apparently he was satisfied with what he read through and between the lines of the Times, for he has this week arrived in the town to complete the contemplated deal.

This is one concrete instance of the unsuspected errands which the home town paper may perform, once it leaves the local office. From time to time new subscribers in distant parts of this country, or other countries, are added to the mailing list, without any local knowledge of who they may be, or why they are interested in the district. But it may be taken for granted that they have a reason, and their interest may eventually develop in something of value to the town.

As has been repeated to the by fostering amateur astronomical societies. And the larger cities, which alone have the financial resources, are providing telescopes and planetariums picturing the entire whirling universe as the astronomers know it.

The best gifts of science to personal culture come when the science is a well loved hobby, not a gainful task. Humanity individually and collectively, would benefit from a universal taking up of such hobbies as astronomy, natural history, the arts and every other department of human knowledge and nature.

TRENCH SILO

(Experimental Farms Note)

At the Dominion Experimental Station, Morden, a trench silo 42 feet long, 5 feet deep, 14 feet wide at the top and 8 feet at bottom was excavated by two men, two teams, a slip scraper and plough in two days. Old squared timbers were used to increase height 2 feet on top, while the soil was dumped on each side of the timber to increase the height above the ground level in preference to excavating the usual depth. Other than the old timbers no lumber was used in building the trench. The only cost was that of labor.

This silo held approximately 70 tons of green corn. Horses

were used for packing the silage. It is highly important to have silage very firm in a trench silo. Sometimes the farm tractor is used at the end of each day to make sure the silage is firmly packed.

After trench silo has been filled, at least two feet of cut straw is blown over the top of the corn. Wet old stack bottoms can be used in preference to dry cut straw. The straw should be well soaked with water and covered over with poles, planks, or anything that will keep the straw or chaff from blowing. After straw has been soaked a pile of oats should be scattered over the surface as the oats tend to sprout and become matted excluding the free passage of air over the top of the silage.

It is preferable to allow silage to ferment and become well settled before opening the silo for feeding. A stone boat with a box attached that can be hauled by one horse may be used for hauling silage from silo to the barn.

There is generally sufficient heat in a trench silo to keep silage from freezing. At no time during the coldest days of winter was the silage frozen to any extent at the Morden Station. The silage should be taken out as you would slice a loaf of bread, taking a width right across the end of the trench.

Owing to the greatly increased acreage of corn seeded this past spring, farmers are well advised to consider the possibilities of the trench silo.

W. J. BREAKEY,
Dominion Experimental Station,
Morden, Man.

Miss Twilla Gourley returned home Monday morning after a three weeks stay in Cardston with relatives and friends.

Frank Hawks, speed merchant of the air flew from Regina to Bridgeport, Conn., in just over 8 hours time, travelling over 200 miles per hour all the way.

DID YOU EVER STOP TO THINK?

By Edson R. Waite

The old saying that the best way to keep peace is to prepare for war has not as yet been proved false.

Admittedly there is small temptation to spend money in fixing up the home or yard during such times as these, but every dollar spent not only adds to your comfort but helps to keep somebody off the unemployment list and helps to bring the time of prosperity a little nearer.

We have a new law to protect "suckers" from unscrupulous promoters who issue questionable investments. The investors who gave away good money for bad bonds in the boom years no doubt feel that the legislation comes much too late to do them any good.

The world is topsy-turvy and so far human-kind has proved incapable of setting it right. Something more original than Economics, Conferences, Memoriums and Expensive Conversations between Representatives of different powers is necessary before the desirable end can be attained.

Loyalty to your home city and a willingness to co-operate with your fellow citizens in working for its welfare is the most important factor in city-building. The great cities of America have been built by people who lived in them rather than by the natural advantages of their location.

A lot of politicians are still continuing to abuse public utilities and their rates. Seems that they think it will make them exceedingly popular and help them to gain or hold office. Most of the people are fed up on that old political game; they have more important things to think about. The high cost of living is worrying everybody. Most everything that enters into the cost of living is skyrocketing in price except utility rates and newspaper advertising.

BANK OF MONTREAL CROP REPORT

Winnipeg, August 14th, 1933

GENERAL

In the Prairie Provinces, further damage has been done to grain crops over large areas particularly in southern and central Saskatchewan and southern Alberta, by drought, heat, grasshoppers and frosts. Harvesting is underway in Saskatchewan and Manitoba, except in the most northerly districts but in Alberta it will not be general for ten days. Rains have benefitted pastures and feed crops in a number of districts. In Quebec good growing weather has prevailed and crops are making satisfactory progress. In Ontario fairly heavy precipitation has materially improved the condition of crops in most districts. In the Maritime Provinces the weather has been favorable to growing crops, but rain is still needed in many sections. In British Columbia the weather conditions continue favorable, and crops generally are making very satisfactory progress. Details follow:—

PRAIRIE PROVINCES

ALBERTA: Northeastern Area. An average yield is expected on summerfallow. Stubble crops and coarse grains are poor. Southeastern Area. The crops have been damaged by drought and frost, low yields are inevitable. Pasturage is poor. Western Area. In the north good yields are indicated; in the south all grains and hay crops are poor. Pastures are badly burned. The irrigated sugar beet crop is a good average.

SASKATCHEWAN. Northern Area. The weather is extremely warm and crops are maturing rapidly. A slight frost damage was reported July 31st. Indications point to a fair yield except in the district west of Saskatoon, where grain crops are almost a failure and the feed situation serious. Southern Area. Scattered showers have been too late to be of benefit. Hail and a tornado did extensive damage in the Kiskeewau-Arcole districts. Pasturage is poor and winter feed will be inadequate.

MANITOBA. Early threshing returns indicate the wheat yields at from 8 to 15 bushel

over most of the Province, but are expected to run higher in the north. Over one thousand square miles in the southwest are an almost total failure, with feed shortage imminent. Coarse grains are light and much of the crop is being cut for feed.

PROVINCE OF QUEBEC

Oats have benefitted through recent rains and prospects for an average crop have improved. Other cereals are doing well and an average yield is expected. Potatoes and other roots are in a satisfactory condition and a better than average crop is indicated in some sections. Tobacco is now making rapid progress, but a below average yield is anticipated. Pastures are generally in fair condition.

PROVINCE OF ONTARIO

Harvesting of fall wheat is nearing completion and threshing returns indicate a slightly under average yield of good quality. Cutting of oats and barley is general, the former is light. Corn is doing well and prospects point to an average crop. Root crops and pastures have been benefitted by recent rains but more moisture is required and a short potato crop is forecast. Meadows in some sections are dry and second growth alfalfa now being cut is short. Tobacco growing districts report sufficient rain fall practically to ensure an almost average yield. Tree fruits are progressing favorably with promise of average apple, pear and grape crops.

MARITIME PROVINCES

Haying is nearly completed. The yield is just about average. Grains are coming along well and an average crop is anticipated. Potatoes and other root crops are generally about average. Apples are making excellent headway and indications point to a heavy crop.

PROVINCE OF B. C.

Grains are in good condition and average crops are indicated. Hay and second growth alfalfa are still being cut. Green and semi-ripe tomatoes are moving freely. Fruit trees are in very good condition. Apples are sizing well and picking of early varieties is commencing. Estimated yields of all fruits are below average. Pasturage generally is good.

Big Fish—Happy Fisherman

Hook a 35 pound musky for yourself like this one and then sympathize with J. A. Gibson of Toronto who fought for four and a half hours near French River Bungalow Camp 215 miles north of Toronto, to land it. It is the seventh musky to be caught near the camp by guests this season and was caught on Friday, July 14th, so the record is still open to be broken. The fish of splendor has been taken place

late in the afternoon right in front of the outlying camp dock in full view of guests who lined the shore and started fires in order to see the finish, forgetting dinner and later celebrating the latest entry in the bungalow camp annual musky competition fittingly. Since every musky to date has practically been larger than the last, the winner of the challenge held this year may become famous... if he can be 12.

Local Retailers

You Have Rights

You know that a manufacturer includes in the selling price of his product a percentage for press advertising—a percentage ranging from 3 to 5 per cent—sometimes, even more—when consumer-resistance is great or when the gross profit margin is very large. So, when a manufacturer spends \$50,000 a year on press advertising, it can be assumed that the total annual sales of his product amount to from \$1,000,000 to \$1,500,000.

Now, if you are stocking a nationally-advertised product—advertised in big-city dailies and in nationally circulated magazines, you have a right to see this product also being locally advertised—in this newspaper. Your total annual sales of the maker's product, joined to those of its other local distributors (if there are others), entitle you to demand that the product be locally advertised in this newspaper.

If the maker or his representative talks to you about the advertising being done for the product in big-city dailies and in national magazines, tell him that upwards of 90 per cent. of the families in your sales territory do not subscribe to a big-city daily or to a national magazine; and that, therefore, he is putting on YOUR shoulders the burden of creating and maintaining sales.

Clearly, it is not RIGHT that you should be required to promote the sale of a product in the territory served by this newspaper, without receiving from the manufacturer the

same kind and degree of sales assistance which he is giving retailers resident in cities where he is spending a lot of money on local advertising.

Quite too often manufacturers don't want to advertise in local weekly newspapers, saying that it costs too much. They forget, however, that their sales in towns served by weekly newspapers provide an advertising fund which should be spent locally. Why should the contributions from local sales to the maker's advertising fund be spent outside the local sales territory?

You have your business to build up, and to the extent that you help manufacturers to obtain and retain sales in this territory, to that extent you should receive local advertising assistance.

You've got a first-class case to put before manufacturers who want you to stock and push the sales of their product, then why not present it, either direct, or through the maker's representative when he calls?

(N.B.—CUT OUT THIS ADVERTISEMENT, AND SHOW IT TO THE REPRESENTATIVE OF FIRMS WHOSE PRODUCTS YOU ARE ASKED TO STOCK AND PUSH).

If you want to keep really cool, eat more
crisp, light foods — fewer hot, heavy
dishes. Kellogg's Corn Flakes lead the
coolness parade. Delicious toasted flakes.
Rich in energy. So easy to digest they
don't "heat you up."

Serve with milk or cream and add
fruits or honey. Made by Kellogg in
London, Ontario

Kellogg's for Coolness

Lis and Louie Cuts, 22 year
old twins of Scott's, insist that
none but twins need ever prop-
ose. Years ago they made their
plans up to marry twins when
they were married, hence the
warning.

When a horse he was hitch-
ing up swung its head around
and hit him in the stomach, Roy
Coulter, 35, of Johnsburg, N.
Y. swallowed his false teeth,
and died of strangulation with-
in a few minutes.

KING MOTORS

Exclusive Representative for Raymond and District

News Notes

Byron Vance was in Leth-
bridge on business last Monday.

Mr. and Mrs. Fred Burton
and family of Cardston, spent
Saturday afternoon and Sunday
with relatives and friends in
Raymond.

The bus was an hour late get-
ting in Monday morning as
"Bill" was delayed with some
business matters connected
with the Company in Waterton.

We had about a dozen drops
of rain Monday evening, when
it looked good for a real storm,
and a good story. There was a
great deal of lightning in the
south-west during the evening.

Conference will convene in
Raymond Saturday and Sunday,
with an evening session Sat-
urday and three sessions Sun-
day, to which the public is in-
vited.

Arnold Zabriskie and wife re-
turned over the week-end from
an extended trip to Vancouver
and Los Angeles and other
coast points. Arnold feels fine
after his trip and is glad to be
home again.

Messrs. O. J. Rolfsen, D. G.
Selman and Owen Lee were in
the United Irrigation District
visiting on Sunday last. The
crops there are very disappoint-
ing this year, these men say.

10,000 drowned, as many
homeless, and 200 villages de-
stroyed is the toll of a flood
on the great Chang River in
China, according to reports.

Many teams from here are
hauling coal now for the win-
ter season. Stirling, Glenwood
and Cardston men are also
there getting their winter's
supply.

Brownsville, Texas was hit by
a tropical storm Friday night,
and much property damage
done by the 80 mile an hour
wind. A typhoon off the coast
of Japan also caught a party of
107 fishermen out in small
boats, and it was feared many
of them would be lost.

The D. A. Bennett family
had a get-together at Waterton
Park over the week-end, when
for once in a great many years
all the children of the family
were home at the same time.
Going up Saturday afternoon,
they enjoyed the evening and
all day Sunday, and returned
home Sunday evening.

Speakers at the Raymond
Second Ward Sacrament Meet-
ing Sunday evening were Elder
Louis R. King, who gave an
illustrated talk on "Jerusalem
and the History of the Holy
Land," and Elder Wayne Wes-
ley who spoke on "The God-
head." Mrs. Eva Noyes read
"My Neighbor," and Misses Sylv-
ia Bacon, Nellie and LaVona
King sang a Vocal Trio. A
good crowd was present, and
thoroughly enjoyed the pro-
gram.

HEALTH

FLATULENCE

Under normal conditions, a
considerable amount of gas is
present in the intestines. The
gas serves a useful purpose in
that it stimulates the contrac-
tions of the bowel which move
the contents of the bowel along
the intestinal tract.

Flatulence means an excessive
production of gas in the intes-
tines, and it is usually due to
one of two causes. The first is
the fermentation of foods which
occur when there is an excess,
in the diet, of sugars, starches
or cellulose, the indigestible re-
sidue of coarse vegetables and
whole grains.

This is most apt to occur in
the person who is constipated,
because in such cases, the con-
tents of the bowel are retained
for a comparatively long time,
and there is thus a greater op-
portunity for fermentation with
gas production. This gas is not
particularly offensive, and the
condition is relieved by passing
the gas as flatus or with the
bowel.

In such cases, it is advisable
to reduce the consumption of
peas, lentils, coarse vegetables,
potatoes and whole-grain cere-
als. The diet with considerable
roughage is not the best diet
for all, even though it is the
best for some people.

The other cause of gas in the
intestines is putrefaction. This
gas is foul and offensive as it
arises from the putrefaction of
proteins in the diet. The chief
source of protein in our diets is
meat. In such cases, too much
meat may have been used, or
due to lack of habit or exercise,
there may not be regular bowel
elimination.

The importance of diet and
elimination are important in
considering this condition. An-
other point noticed is that the
same diet is not suited to all
persons. This is largely the re-
sult of abnormal conditions
which have been allowed to
develop. If the bowel has be-
come irritated, it is obvious
that coarse foods are not suit-
able as their use is apt to ag-
gravate the irritation.

Diet is not the only consid-
eration. Exercise, rest, fresh air,
cleanliness and regular elimi-
nation must also be secured if
the body is to be properly nour-
ished and kept free from the
abnormal conditions which cause
distress and discomfort. Health
is more than freedom
from disease. The healthy body
runs smoothly and efficiently;
the healthy individual is effec-
tive and happy.

CULLING THE LAYING FLOCK

(Experimental Farms Note.)

With the general low price
of poultry products now prevail-
ing, it behooves the poultryman
to keep his cost of production
as low as possible. Present eco-
nomic conditions call for the
elimination of the undesirable
and unprofitable hens from the
farm flocks, thereby increasing
the quantity and improving the
quality of eggs produced and
decreasing the cost of produc-
tion by a saving of feed, hens-
ing and management wasted on
the non-producing or low-prod-
ucing hens.

It is important to be able

to distinguish between the lay-
ing and the non-laying birds.
If a bird is laying the comb
will be red and full, the vent
dilated and moist, the pelvic
bones thin, pliable and wide
apart and the abdomen large,
soft and pliable, while if not
laying the comb will be pale or
whitish-coloured, the vent con-
tracted and dry, the pelvic
bones rigid and close together
and the abdomen firm or hard.
In a yellow-skinned bird the
beak, vent and shank of a heavy
layer are pale yellow or white
in colour, whereas the beak,
vent and shank of a poor layer
or of a layer that is taking a
long rest are usually bright
yellow in colour.

The health and type of the
layers are also important points
to be taken into consideration
in culling. Only those birds that
are healthy and vigorous and
that have a wide back of good
length combined with a deep
body should be retained in the
flock.

One other important feature
that should be kept in mind in
culling is to note the time of
the molt. As a rule birds that
molt before the first of Septem-
ber are poor layers, while those
that molt later in the year are
good layers. The latter part of
August is, then, an excellent
period for culling the laying
flock and at that time all hens
that have quit laying should be
culled.

The above mentioned factors
are kept in mind when culling
the laying flock at the Domi-
nion Experimental Station, Lac-
ombe, Alberta. A close watch
is always kept on the flock for
any out-standing boarders and
these are marked and disposed
of in the late summer or early
fall.

H. E. Wilson,

Dominion Experimental Station,
Lacombe, Alberta.

BY THE NEWSPAPER

(High River Times)

This week there occurred an
incident, interesting at least to
the local press. A business man
in a remote city had contem-
plated purchasing a business in
High River. He was in doubt
as to the move, and as a pre-
cautionary measure decided to
subscribe to the High River
Times and find out what man-
ner of town this might be. For
six months, it seems, he has
been one of our subscribers,
studying news columns and ad-
vertisements, and probabilities
and the class of people here. Ap-
parently he was satisfied with
what he read through and be-
tween the lines of the Times, for
he has this week arrived in the
town to complete the contem-
plated deal.

This is one concrete instance

of the unsuspected errands
which the home town paper
may perform, once it leaves the
local office. From time to time
new subscribers in distant parts
of this country, or other coun-
tries, are added to the mailing
list, without any local know-
ledge of who they may be, or
why they are interested in the
district. But it may be taken
for granted that they have a
reason, and their interest may
eventually develop in something
of value to the town.

As has been repeated to the
point of monotony, the weekly
newspaper is, in a sense, the
show window of the district,
and the editor is constantly seek-
ing for attractive material with
which to dress his show win-
dow. He reacts to the news of
my little achievement or suc-
cess on the part of any citizen,
as a father reacts to good news
from a member of the family.
It is something bright, colorful
or valuable for the show win-
dow. It reflects credit on the
whole High River family. And
there is no telling whose eye
may be attracted. Remember,
if there is some modest accom-
plishment to your credit or the
credit of your neighbor, let your
newspaper know about it. It
will brighten the show window.

News Notes

Mrs. Harold Blackmore was
a Lethbridge visitor on Monday.

Howard Oliver of Calgary
was a Raymond visitor over
the week-end.

Mr. and Mrs. S. I. May, Ross
Larson and Ab. Hague were
Lethbridge visitors Monday of
this week.
